TOWN'S STORM WATER MANAGEMENT PROGRAM

Fall - Leafy Debris Removal

There are a few steps that you can take to prepare your yard waste for trash day. Yard waste is collected the same day of the week as your trash.

- Please place your yard waste and trash curbside by 7:00 AM, but not more than 24 hours prior to your trash day.
- To prepare the yard waste, cut brush, branches, and tree limbs into four (4) foot lengths and then tie into bundles that do not weigh more than 50 pounds.
- Grass clippings, shrub clipping, weeds, and leaves must be placed in 30-gallon kraft, recyclable bags that can be purchased at the grocery or home improvement store.
- To save time and money, leave your grass clippings on the lawn to help reduce the need for fertilizer or compost them in your yard.
- In November, leaves are collected on your street based on your location. Leaves can be raked loose to the curb, but must not block drainage ditches or roadways.

For more information regarding the Town's storm water management program, call at 703-435-6853.
